

Solutions Owner

Do you have experience in developing innovative hardware and software solutions ?
Do you want to join a fast-growing start-up in the medical field ?
Do you want a meaningful job with a direct impact on society ?

The Kaspard solution

Active in nursing homes and hospitals, Kaspard is an innovative, contactless and non-intrusive solution that detects falls and wandering.

Based on a small device placed on the ceiling in the room, the solution allows care teams to receive real-time alarms in case of problems and reports on nocturnal activities. www.kaspard.com
<https://www.youtube.com/watch?v=LT1oKKzCdg&t=25s>

The robustness of the system comes from the combination of a powerful own device and an unique algorithm. The solution installed in the residences consists of the devices, a local server, reporting screens, and interfaces with the nursing call systems..

The Company

In 3 years, the company has developed an unique and efficient solution and is present in the largest European groups. We are a team of 12 motivated and competent people who combine the desire for innovation, the start-up spirit and the excellence that is essential in our sector.

We want to contribute to the room of the future, to improve the quality of care through information.
